

Supporting a Ball in Front of the Shoulders

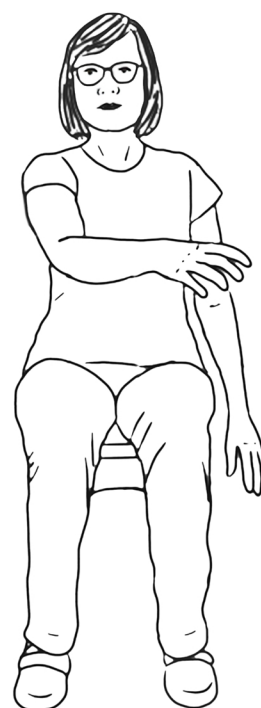

1. Sit in the best upright posture with your arms relaxed by your sides. Let go of excess muscle tension.

2. Breathe in gently as you turn to the left and your right arm slowly raises up in front of your left shoulder or a comfortable height.

3. Breathe out as you turn back. Your right arm lowers to your side and palm turns down.

4. Repeat moves 2 & 3 on the opposite side. Imagine you are supporting a ball on your palm. Continue x ____

To finish, breathe out as your arm lowers back to the starting position.
